

MEDIUM-DUTY WELDING BLANKET

Data Sheet

FEATURES:

- High performance material with excellent abrasion resistance
- Resists sparks and medium metal splatter
- Approx. Service Temperature – continuous 290°C, short term 350°C
- Available in various width options: 1.8m, 2.4m or 3.6m
- Length: 1.8 metres

MEDIUM-DUTY WELDING BLANKET

Available in three sizes, the medium-duty welding blankets are flexible and lightweight with the ability to resist sparks, medium metal splatter, and are self-extinguishing too. The high-performance welding drape is silicone coated on both sides of the glass fibre blanket for use in areas where oils, greases, acidic liquids and vapours are present.

1.8 metres long the medium-duty welding blanket is very flexible and ideal for hanging or draping with brass eyelets to secure in position. Three widths of 1.8m, 2.4m or 3.6-metre give complete protection and this fire-retardant blanket is primarily used by people carrying out Hot Works.

Suitable for industrial working environments, it has excellent resistance against wear and abrasion and will not deteriorate over time from weathering or flexing with a material weight of 280g/m². Manufactured for Vigil Products, the medium-duty welding blanket has an approximate continuous working temperature of 290°C, or 350°C for short-term exposure.

Product	Medium Duty Welding Blanket - 1.8m	Medium Duty Welding Blanket - 2.4m	Medium Duty Welding Blanket - 3.6m
Product Code	VP-WB18M	VP-WB24M	VP-WB36M
Weight	1.2kg	1.52kg	2.80kg
Dimensions	1.8 x 1.8m	1.8 x 2.4m	1.8 x 3.6m
Service Temperature	Continuous 290°C / Short term 350°C	Continuous 290°C / Short term 350°C	Continuous 290°C / Short term 350°C
Material	Silicone-coated glass fibre blanket	Silicone-coated glass fibre blanket	Silicone-coated glass fibre blanket
Carton Quantity	20	15	10
Carton Weight	23kg	23kg	20kg
Carton Dimensions	40x34x44mm	40x37x38mm	43x40x25mm
