Unit 11C, Claremont Way, Lakesview Industrial Park, Canterbury CT3 4BF

VIGIL FIRE BEATER

With the cone chain connector, you're able to create a temporary barrier using standard traffic cones, which will withstand weather extremes, unlike the commonly-used striped barrier tape.

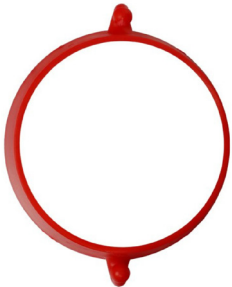

Simply slide on top of your traffic or road cone, and then connect plastic chain between each cone using the connector.

Featuring ball-ended hooks, the chain is easy to attach and remove as needed whilst also preventing the chain from simply falling off.

Suitable for cones of 500mm, 750mm and 1m in height, they have a high-visibility red finish which means the holder will blend in with the cone so it remains seen.

The one-piece polyethylene construction means they're economical, high-strength, and designed to stack for easy storage which takes up minimal space.

By selling our traffic cone chain connectors individually, you're able to easily purchase the exact number you need.

Product	Cone Chain Connector
Product Code	VP-CCR
Size	40x110x100mm
Material	Polyethylene
Weight	0.02kg
Fits	Traffic Cones - 500mm, 750mm and 1m in height
Carton Quantity	500
Carton Weight	9.68kg
Carton Dimensions	400x550x340mm
