DRIVEWAY MIRRORS

Our weatherproof driveway mirror is virtually unbreakable. Available in two sizes – 450mm and 600mm – they are supplied with an adjustable, heavy-duty fixing bracket, this multi-purpose convex mirror creates the perfect viewing angle for safe exit from your driveway. It can be fixed to a post and angled with the fixings included.

Manufactured for Vigil Products, there's no more shattering from stone chips as the polypropylene body can take a lot of punishment and winter weather. The polycarbonate mirror is soft to the touch and, if pressed, it will simply return to its original convex shape.

The mirror is identical to our indoor model (indoor model has a wall bracket in place of the post bracket) but this one has an integral anti-glare hood to shade the sunlight and make it easy to drive safely from your home or for a tight bend. Most roadside mirrors are commonly the 450mm size offering up to 10 metres viewing distance, while the larger 600mm size increases the viewing distance to up to 15 metres.
