WALL MOUNTED RETRACTABLE BARRIER – 5M

Our wall-mounted retractable barrier uses a black stainless steel body with an extremely durable 5 metre (most are only 3 metres) polyester cross weave belt that won't fray over time – choose between a black belt or a yellow and black chevron design for an area where you want to promote extra caution. The safe retracting brake adds safety when let go. Each unit includes the universal belt clip for fixing along with screws and wall plugs.

The ultimate reliable and trouble-free crowd control barrier to control corridors or doorways, it is suitable for banks, shops, entertainment venues, universities, airports, entrances, lift lobbies, conferences, galleries, museums and other business and professional environments.

The fixing will also work in conjunction with our retractable barrier post.
