HEAVY DUTY WALL GUARD

Protecting walls and vehicles from damage, the rubber wall guard takes the minor bumps and scrapes that happen every day, especially in busy areas such as commercial and industrial applications including car parks, garages, workshops, warehouses and loading bays. Suitable for internal and external use, the wall bumper features a high-visibility yellow strip to warn against potential hazard.

With three pre-drilled fixing holes, the wall protection strips are easy to install directly to any wall you want to protect. As a result, walls and corners are kept in top-notch condition and stops car doors from getting scratched or nicked. The impact-absorbing barrier is suitable for shopping trolleys, cars, vans, lorries, and forklifts. Designed for easy installation to solid concrete walls. For other wall types, please use suitable fixings.

Each rubber wall guard is constructed of 100% recycled rubber, measuring 40(H) x 1000(W) x 160(D)mm. Manufactured for Vigil Products, these bumpers are weatherproof and heavy-duty, they're suitable for use individually or placed end-to-end to protect a large area.

Product	Heavy Duty Wall Guard
Product Code	VP-RWP1000
H x W x D	40x1000x160mm
Weight	3.52kg
Colour	Yellow and Black
Material	100% recycled solid rubber
Carton Quantity	4
Carton Weight	14.46kg
Carton Dimensions	1005x195x170mm
