TELESCOPIC CONE BAR BARRIERS

The telescopic cone bar barrier is designed to set up in seconds using two traffic cones to provide easy demarcation and is available in yellow and black or red and white. With a standard length of 1.2 metres, these can extend to a maximum length of 2.4 metres and are suitable for cordoning off larger areas by simply adding more cones and poles.

Easy to connect to any cone using the 360° pivot loops, these look best when used with 750mm traffic cones, but are suitable for use with virtually any cone. The lightweight design means it would be easy for a single person to carry a bundle of telescopic cone poles, making them perfect as a temporary barrier in car parks to restrict access.

Manufactured for Vigil Products, the robust and durable design means they're also suitable for tough environments such as construction sites where they're used to create a pedestrian barrier. Unlike others, our telescopic cone bar barrier is UV-resistant to prevent fading, so these remain highly visible for many years.

Product	Telescopic Cone Bar Barrier – Red & White	Telescopic Cone Bar Barrier – Yellow & Black
Product Code	VP-TCB-RW	VP-TCB-YB
H x W x D	110x110x1270mm	110x110x1270mm
Weight	0.5kg	0.5kg
Max Length	Up to 2.4m	Up to 2.4m
Colour	Red & White	Yellow & Black
Carton Quantity	30	30
Carton Weight	14.92kg	17.04kg
Carton Dimensions	200x310x1290mm	210x330x1290mm
