CABLE PROTECTOR RAMP

The yellow cable protector ramp allows you to effortlessly trail cables and small hosing inside warehouses and factories, or outside on construction sites and at temporary events. Suitable for foot traffic and occasional traffic temporarily, the chequer plate design creates a non-slip surface and has interlocking connectors so multiple cable covers can securely fit together for longer runs.

Available in one-metre lengths, the single-channel cable guard will help prevent slips and trips as well as avoiding damage that can cause disconnection, electrocution or fire. The cable protector measures 38mm x 15mm, available in a hazard-yellow colour that's hard to miss.

Manufactured for Vigil Products, make your workplace safer by not having loose electrical wiring or hosing left loose with our cable protector ramp.

Product	Cable Protector Ramp
Product Code	VP-CR1000Y
H x W x D	20x130x1050mm
Weight	0.68kg
Channels	Single
Colour	Yellow
Carton Quantity	20
Carton Weight	14.44kg
Carton Dimensions	210x270x1070mm
