FLOOR CABLE PROTECTORS

The indoor floor cable protector prevents accidents caused by trailing cables, keeps your premises looking neat and tidy, and protects wires from damage. Suitable for light-duty use in foot-traffic areas, the cable cover features a ribbed, non-slip back to ensure it doesn't move around, with a tapered design to prevent trips and to allow easy passage for trolleys.

Available in 1 metre and 9 metre lengths, the floor cable tidy is easy to suit to whichever length suits your requirements. With a pre-slit rear cavity making it easy to insert cables, these are suitable for offices, warehouses, factories, schools, hospitals and even around the home.

Manufactured for Vigil Products, the cable cover makes it easy prevent the most common accidents that occur in the workplace. With many offices having computer, phone and printer cables trailing across floors, this is a cost-effective and simple cable management solution.
