VIGIL 230 SELECTABLE FIRE NOZZLE

The Vigil 230 selectable fire nozzle is the ideal multipurpose turbo nozzle suitable for a wide range of industrial applications. Easy to operate, use the twisting adjustment to change between straight stream, narrow fog, wide fog and flush output spray patterns, while the other adjustable ring on the main body allows the manual adjustment of water flow through a pre-set range of flow settings. Together, you can create the fog pattern required for the environment while allowing for maximum extinguishing effect with minimum water consumption.

Manufactured for Vigil Products in accordance with BSEN-15182, the selectable fire nozzle has a maximum flow of 230 litres per minute with a 6 bar working pressure. It comes complete with an integral 2 ½" instantaneous alloy male inlet (BS 336) for UK fixings.

With a hard anodised aluminium body and ABS handle with a rubber bumper, the Vigil 230 selectable fire nozzle has a lightweight and robust design that's perfect for demanding environments. The stainless-steel spinning teeth create different fog patterns, while the laser engraved settings on the body ensure you can see the various settings available.

Selectable fire nozzles are a popular choice by professional firefighters and are regularly used for wash-down applications, heavy dust suppression, and in marine and oil rig environments.

Product	Vigil 230 Selectable Fire Nozzle
Product Code	VP-FNSXS230
H x W x D	150x360x300mm
Weight	1.96kg
Compliance	BS336
Working Pressure	6 Bar
Throw Range	20 metres
Material	Aluminium body, ABS handle and rubber bumper
Carton Quantity	5
Carton Dimensions	330x400x770mm
Carton Weight	11.3kg
