# VIGIL 475 SELECTABLE FIRE NOZZLE

Suitable for industrial users and firefighters alike, the Vigil 475 selectable fire nozzle has a medium-to-high maximum flow rate of 475 litres per minute and can work at a maximum working pressure of 16 bar. This professional nozzle has a straight stream, narrow fog and wide fog spray patterns which are easily changed using the twist adjuster which features raised identification to assist in low visibility environments.

The main body also features an additional ring to manually adjust the water flow, meaning you can minimise water consumption without impacting your extinguishing ability. Manufactured for Vigil Products in accordance with BSEN-15182, the selectable fire nozzle comes complete with an integral 2 1/2" instantaneous alloy male inlet (BS 336) for UK fixings.

With a hard anodised aluminium body and ABS handle with a rubber bumper, the Vigil 475 selectable fire nozzle has a lightweight and robust design that's perfect for demanding environments. The stainless-steel spinning teeth create different fog patterns, while the laser engraved settings on the body ensure you can see the various settings available.

Selectable fire nozzles are a popular choice by professional firefighters and are regularly used for wash-down applications, heavy dust suppression, and in marine and oil rig environments.

Product	Vigil 475 Selectable Fire Nozzle
Product Code	VP-FNSXS475
H x W x D	150x360x300
Weight	2.26kg
Compliance	BS336
Working Pressure	6 Bar
Throw Range	40 metres
Material	Aluminium body, ABS handle and rubber bumper
Carton Quantity	5
Carton Dimensions	330x380x810mm
Carton Weight	12.76kg
