FOLDING MOBILE BARRIER

You won't find a barrier that is easier and quicker to deploy than the folding mobile barrier, with a maximum length of 3.9 metres it is the ideal solution for restricting access and controlling a crowd, especially in an emergency. Often used in supermarkets, shopping centres, schools, public spaces and workplaces, you can use these the expanding barrier to cordon off an area for essential maintenance or cleaning, to prevent use broken equipment, or simply to prevent people from passing.

With a collapsible design and locking straps which keep it closed, the lightweight design and wheels makes it easy for a single person to transport and means it required little storage space when not in use. Despite being lightweight, the portable barrier in constructed from rigid polypropylene for durability and a long working life, while the high visibility yellow makes this hard to miss.

The mobile barricade system is versatile thanks to the 16 hinged panels – each 300mm wide except the end panels – this makes it easy to be set out to a desired length, up to an impressive 3900mm wide, in either a straight line or curved to go around an obstacle. This expanding barrier is versatile to your requirements and adaptable to changing situations.

Suitable for indoor use, the mobile barrier required no assembly and stands an 1000mm tall. When collapsed down for storing, the portable barrier measures just 580mm x 310mm, meaning this will neatly tuck away in your cupboard without using up all of your storage space.

Product	Folding Mobile Barrier
