EXPANDABLE SAFETY BARRIER – PLASTIC

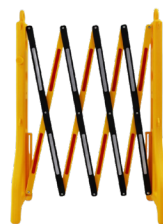

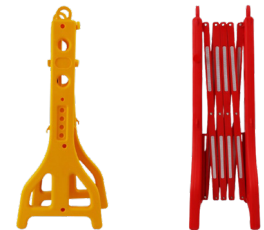

Available in red and white or yellow and black, the plastic expandable safety barrier has a concertina design which makes this quick to deploy to a length of up to 2.5m whilst also being compact for easy storage. Suitable for use indoors and out, the extending barrier is often used in workplaces and public spaces, as well as construction sites and temporary events, and is used to restrict access, cordon off hazards, or as a crowd control tool.

Fitted with reflective panels to make the safety barrier visible in all light conditions, it has a lightweight design to make this portable but has a water-fillable base to increase stability, making it ideal for windy conditions. Manufactured for Vigil Products of robust polypropylene, it's strong and durable, corrosion-resistant and UV-resistant, whilst remaining easy to reposition.

Adaptable to the task at hand and standing at 960mm tall, when collapsed down for storage, the expanding safety barrier measures 380mm x 240mm, meaning the barricade doesn't take up much space in your cupboard.

Product	Plastic Expanding Safety Barrier – 2.5 metres – Red & White	Plastic Expanding Safety Barrier – 2.5 metres – Yellow & Black
