## CONE-MOUNTED RETRACTABLE BARRIER

The cone-mounted retractable barrier makes it easy to restrict access to outdoor areas, designed to fit atop most UK traffic cones, it is more effective at controlling access than cones used alone. Light and portable, the retracting belt has a white and red chevron design which is widely recognised as requiring caution, and has a maximum belt length of 3 metres to create a temporary barrier.

Quick and easy to deploy, the belt is compatible with most other types of retracting barriers, each cone topper features 3 connectors for the belt to securely fit on, meaning it can work in four separate directions. Included with your cone-mounted retracting barrier is a clip which attaches to the belt to prevent it from springing back the moment it is released or locks the belt at a certain length.

Manufactured for Vigil Products, the orange colour means it doesn't look out of place on top of your traffic cones, it is best used with multiples to ensure you have something to attach to the other end of the belt. Suitable for indoor and outdoor use, you'll often find the retractable cone topper used on construction sites, at events, in car parks and around the workplace, particularly in warehouses and factories.

Product	Cone-Mounted Retractable Barrier – 3-metre
Product Code	VP-RCT-3
Size	240x100x100mm
Material	Nylon retractable belt
Weight	0.32kg
Suitable for	750mm traffic cones
Carton Quantity	20
Carton Weight	7.34kg
Carton Dimensions	480x390x250mm
