600G CAR FIRE EXTINGUISHERS

Our 600g car fire extinguisher is filled with an ABC powder and is often found in vehicles, homes, caravans, sheds and anywhere else where space is limited for fire protection is essential. Despite its compact size, it has an impressive 5A 21B fire rating and is supplied with a mounting bracket as standard which holds it securely whilst ensuring it can be removed quickly in an emergency.

Your new 600g powder fire extinguisher is CE Marked, manufactured to BS 6165:2019 and has a 5-year warranty for peace of mind. Most other small fire extinguishers of this size are not suitable for Class A fires (with BC rating), so with ours you get even more firefighting powder without paying any more.

To use your aerosol fire extinguisher, simply pull the safety clip out from the handle and then depress the button on top using your thumb while aiming at the base of the base and holding it upright.

The extinguisher bracket includes wall fixings, as well as adhesive-backed hook and loop fastener, meaning you can install the Vigil Products 600g powder fire extinguisher wherever and however suits your needs.
